Symbols used:

- () means "nil".
- (..) means "not available".
- (--) means "less than 1 acre".

Signes conventionnels:

- () néant.
- (..) non disponible.
- (--) moins d'une acre.

INTRODUCTION

This bulletin includes a number of tables giving 1961 Census of Agriculture data by county or census division for commercial farms. Similar information for all census farms is included in Volume V of the Volume series of reports released in June 1963. The previously released Volume series also includes information for commercial farms on a provincial basis in Tables 1, 31 and 37. Table 1 was released in the Advance Series of reports as Bulletin AA-5 (Catalogue No. 96-520).

An explanation of the various items and terms included in the tables of this report is to be found in the introduction contained in each of the Volume Series of reports. An analysis of the sample check on the quality of the Census of Agriculture is also included in the Volume reports.

Definition of a Commercial Farm

Commercial farms, as defined in the Census, include all farms reporting \$1,200 or more sales of agricultural products for a 12-month period (excluding institutional-type farms).

Definition of a Census Farm

For census purposes, a farm is defined as a holding of 1 acre or more with sales of agricultural products during the past 12 months valued at \$50 or more. This definition is more restrictive than that used in 1956 or 1951 and some of the intercensal changes in number and area of census farms are a result of the change in farm definition. Data for commercial farms however, are not affected by the change in farm definition.

Le présent bulletin contient un certain nombre de tableaux qui donnent, par comté ou division de recensement, les chiffres du recensement de l'agriculture de 1961 sur <u>les fermes commerciales</u>. Des renseignements semblables sur toutes les fermes de recensement sont contenus dans le volume V de la série de rapports publiés en juin 1963. Les rapports déjà publiés contiennent aussi des renseignements, par province, sur les fermes commerciales aux tableaux 1, 31 et 37. Le tableau 1 a été publié dans la série de rapports anticipés comme bulletin AA-5 (nº de catalogue 96-520).

On trouvera dans l'introduction de chacun des rapports du volume une explication des divers articles et termes employés dans les tableaux du présent rapport. Les rapports du volume contiennent aussi une analyse du contrôle fragmentaire de la qualité du recensement de l'agriculture.

Définition d'une ferme commerciale

Les fermes commerciales, de par leur définition de recensement, comprennent toutes les fermes qui ont déclaré des ventes de produits agricoles de \$1,200 ou plus durant une période de 12 mois; elles ne comprennent pas les fermes d'institution.

Définition d'une ferme de recensement

Pour les besoins du recensement, une ferme est une exploitation de l'acre ou plus qui a vendu au cours des 12 mois antérieurs pour \$50 ou plus de produits agricoles. Cette définition est plus restrictive que celle de 1956 ou de 1951 et une partie du changement quant au nombre et à la superficie des fermes de recensement, d'un recensement à l'autre, est le résultat du changement apporté à la définition. Toutefois, le changement de définition ne modifie pas les chiffres relatifs aux fermes commerciales.

TABLEAU 9. Fermes commerciales - valeur des produits agricoles vendus, 1960(1), par comté
Nota: Les chiffres de ce tableau ont été réunis surtout pour les besoins du classement des fermes mais ils sont publiés
en raison de leur utilité dans les études à l'échelon du comté ou de la division de recensement. Ils diffèrent de ceux du revenu monétaire publiés par la Division de l'agriculture du B.F.S. et l'usager ne devra les utiliser qu'avec réserve. Voir
l'Introduction.

Un X indique que les chiffres sont retenus afin de ne pas divulguer les opérations particulières, mais ils sont compris dans les totaux.
